

PARC reduces the complexity of designing and building parking structures and offers owners & developers a more efficient(e) 8 (3) To(1)-Gein-Herom entitlement to hand over.

As a result, PARC delivers a low-risk, high-quality parking structure with design flexibility at the lowest cost in the shortest amount of time. For owners, this means overall cost reductions of 5%-10%, and structures delivered 30%-50% faster than traditional methods.
